

## PERSONAL EXPENSE TRACKER APPLICATION

### PROBLEM STATEMENT

Many organizations have their own system to record their income and expenses, and track their employee expense for their company and make reimbursement and advance. As well as, it is a good habit for a person to record daily expenses and earning but due to unawareness and lack of proper applications to suit their privacy, lacking decision making capacity people are using traditional note keeping methods to do so.

Who faced the problem?	People who getting daily and monthly wages.
What is the issue faced?	In traditional, there is a paper based expense tracking system that does not provide the user portability, existing system only used on paper based records so unable to update anywhere expenses done. Paper record is not always available.
When does the issue occur?	When the digits could not be identified correctly. When the paper based expense tracker records are subjected to fire accident, flood, etc.
Where is the issue occurring?	Occurs when the person is unable to track their income and expenditure.
Why is it important that we fix the issue?	By solving, people can track their expenses and avoid unwanted expenses.
